PRESS RELEASE

September 2008 – For immediate release

WINSTON CHURCHILL SCHOOL CLEANS UP

Winston Churchill School, the well-known local authority specialist sports college in Woking, has recently installed large areas of Frontrunner Plus at all its entrances. The high performance matting, part of the Frontrunner Entrance Flooring System, has been used in standalone modules, with ramped edges to eliminate tripping. Surface mounting on the existing carpet eliminated the cost and disruption of retrofitting recessed matwells.

These precautions have not only prevented the ingress of dirt on the shoes of hundreds of pupils but also dramatically improved the appearance of the entrances. At the same time, maintenance costs have been reduced.

The cleaning system was specifically chosen by Surrey County Council because of its proven reputation for reducing maintenance. Frontrunner Plus matting is designed with integral absorbent insets within a heel-proof vinyl grid. This combination will scrape, clean and dry shoes while any dirt remaining falls through the grid and is not transferred inside. Another advantage for the school is that the entrance matting is visitor-friendly, particularly for the less able because it is heel-proof, stick-proof and does not inhibit wheel-chairs.

Frontrunner Plus can be trimmed easily on site to fit any shape, such as within revolving doors or in irregular shaped matwells. Its unique flexibility means it will contour over uneven or rough surfaces, while remaining stable underfoot. It is easily lifted for cleaning and removal of dirt.

Other options include, Frontrunner Brush with nylon brush inserts to combat severe soiling, Frontrunner 100% grid vinyl without inserts and Frontrunner XT with extra surface grip for external use.

Samples and Frontrunner Entrance Flooring System brochure are available from Plastic Extruders Ltd (tel 01268 571116) or visit www.frontrunnerplus.com
